

CLASSROOM TRAINING: FIRST AID REFRESHER

OVERVIEW

Through theoretical and practical training the purpose is to refresh the participants previously gained knowledge and basic skills from the First Aid BST Module. By the end of the training participants must be able to administer safe and effective First Aid including use of first aid response equipment and correct operation of the AED (Automatic External Defibrillator). Possession of a valid certificate from the First Aid GWO Basic Safety Training, as well as the Working at Heights GWO Training is required. Participants must be physically able to work in the selected work environment.

RELEVANT TO

All technicians, who have already participated in First Aid training and need to refresh their knowledge
